*A press release sent out on PRNewswire.***Cherokee Medicine Man Reveals Natural Healing Formulas on Deathbed  
Legacy of Ancient Knowledge Provides Natural Solutions to Modern World**

ODESSA, Texas, May 2 /PRNewswire/ -- In 1985, in the mountains of North Georgia, a very unlikely candidate received a vision from God that could very well have a profound effect on the health and well being of the worlds' population. Instructed to create a "healing ministry," the late Native American healer, Chief Two Trees, spent the rest of his life administering to the sick using herbal formulas and "laying on of the hands." He was one of the last Medicine Men descended from the Bear Clan of the Cherokee, and with his passing, many feared that his secrets would be lost. But now for the first time, these healing formulas have been made available to the outside world.

"The formulas were divinely inspired and produced remarkable results for his clients throughout his many years of treating people," states his daughter, Dr. Darlene Two Trees. "My father passed this sacred trust to me the day the revered white buffalo calf was born. It is now my mission to carry on his noble work on a larger scale and make these formulas available to the millions of people who need them."

In turn, the profits from the formulas will go to fund a non-profit organization that provides both a natural healing clinic and an organic farm that will help the poor receive needed care. With degrees in Naturopathy and Nursing, Darlene has spent the last five years developing the 28 essential herbal formulas into the most effective and potent bio-available forms possible. The formulas passed down from her father include those for cancer, immune function, arthritis, sexual function, weight control and many more.

Presently based in Odessa, Texas, the first eight of the "sacred" herbal products are now available world wide from their websites, <http://www.herbsforasizzlingsexlife.com> and <http://www.chieftwotreesplantspiritessences.com>. "It is my vision to continue my father's work by offering food and natural health care to those in poverty circumstances and to teach others to duplicate this work in their own communities. Small projects of inspiration and love that will produce a big difference in the quality of human life," says Dr. Two Trees.
